

- **High School Varsity Wrestling Team** 2009 ~ 2011

I joined Wrestling Team in high school junior year. I practiced and trained for six hours every week including Saturday. I played for many high school competitions in Indiana State. Although I did not accomplish outstanding achievements, it enhanced my competitive spirit, leadership, and confidence. Also, the dedication to my first sports team brought my will power and fitness to next level.

- **Volunteer for translating ‘Evangelii Gaudium’** Apr. 2016 ~ June. 2016

I was asked by my catholic community to translate document written by Pope into Korean. It was more than thousand pages long and I had to finish the translation by certain date so that Catholic Church members and believers could read official document from the Vatican. The offer was not very lucrative since it would be unpaid and take significant amount of my time and space. However, I wanted to contribute to my church community and be blessed by God so I decided to take offer. I spent 56 hours a week to finish the work by the deadline.

- **Topcoder ‘17 Algorithm Competition Regional Event** 2017

The event was held in Google at Pittsburgh and participants came from many various countries. All participants were given only two hours to solve tasks in the competition. I was not awarded the first place or special recognition. However, I enjoyed the event because I loved coding and had the invaluable opportunity to discuss with other skillful programmers how to implement algorithms and solve practical problems.
